Term	Week	Focus	Summary	Learning Outcomes	Learning skills
Term 1.1	1	Why is the world's population growing?	Outline the factors influencing population change and interpret different population measures.	Learning Objective: "Understand the factors influencing world population growth and interpret birth/death rate data to analyze population change in Mali." Success Criteria: "Successfully sort effects of population change, create a graph for birth/death rates, and identify key points from a population-related text."	*Critical thinking, hardworking time*
	2	Where do people live in Russia?	Outline why Russia's climate effects where people live.	Learning Objective: "Explore how Russia's climate and physical environment influence its population distribution and living conditions." Success Criteria: "Accurately map Russia's features, write a short report on population distribution, and explain the west-east population disparity."	*Critical thinking, analyzing, agile*
	3	How do population structures vary?	Examine how population pyramids can be used to understand a country's population.	Learning Objective: "Understand the concept of population pyramids, their use in representing population structure, and their role in planning." Success Criteria: "Interpret data, annotate and complete population pyramids, compare population structures of	*Critical thinking*

				Russia and Ethiopia, reflect on learning."	
	4	Why does a city's population change?	Outline the impacts that St Petersburg's population change has had on the city over time.	Learning Objective: "Examine St Petersburg's population changes over time, effects on housing, and benefits of flood protection in modern cities." Success Criteria: "Interpret photos, historical maps, annotate population graph accurately, compare housing variations, and outline flood protection benefits."	*Critical thinking, analysing*
	5	Why does a city's population change?	Interpreting the issues faced with rapid urbanisation, and applying this to Hyderabad.	Learning Objective: "Explore the concept of urban transition, problems and solutions to rapid urbanisation, with a focus on Hyderabad's case study." Success Criteria: "Interpret choropleth map and graphs, outline urbanisation issues in Hyderabad, and write an article on improving residents' life."	*Creative time, risky learning*
	6	Review and Assessment	What do I know about population and cities?	To review their work and complete an assessment on population and cities.	*Hardworking time, meta moment*

Term 1.2	1	Coastal Landscapes	Understanding the nature of coastal landscapes.	Learning Objective: "Identify and understand key characteristics of coastal landscapes." Success Criteria: "Explain key features of a coastal landscape accurately."	*Risky learning, critical thinking*
	2	Coastal Processes	Exploration of processes shaping coastal landscapes.	Learning Objective: "Understand and describe coastal processes such as erosion and deposition." Success Criteria: "Clearly explain how erosion and deposition shape coastlines."	*Connection to find new learning, critical thinking, hardworking time*
	3	Coastal Landforms	Exploration of processes shaping coastal landscapes.	Learning Objective: "Identify and understand different coastal landforms." Success Criteria: "Successfully identify and describe various coastal landforms."	*Risky learning, agile, analysing*
	4	Impacts of Coastal Erosion on People	Studying the societal impacts of coastal erosion.	Learning Objective: "Explore the effects of coastal erosion on human activities." Success Criteria: "Explain how coastal erosion affects communities and their livelihoods."	*Collaborative classroom, critical thinking*
	5	Coastal Management	Understanding how coasts are managed to prevent erosion.	Learning Objective: "Understand the strategies used for coastal management." Success Criteria: "Describe different strategies used to manage and prevent coastal erosion.	*Critical thinking*

	6	Management Assessment	Evaluation of different coastal management strategies.	Learning Objective: "Assess the effectiveness of different coastal management strategies." Success Criteria: "Successfully critique various coastal management strategies and their effectiveness."	*Critical thinking*
